The Marble Family

Here is a little of our story. Our marriage started out as most typical marriages do, excited about starting a family together and having a happy ever after. We celebrated our first son's birth, Isaac in 2004. We had so much fun with him, we knew we wanted him to have a sibling, someone to play with. So in 2006 we were excited to welcome our daughter Abigail into our family. We had no complications at birth but noticed by 4 months things didn't seem quite right, she wasn't able to hold her head up like other kids that age. My sister-in-law encouraged me to have her see a neurologist. I will never forget that day.

It was Valentines day, Abby was 6 months and we were headed to Mary Bridge Children's Hospital to have her appointment. Her appointment went well, but there were going to be many tests ahead. We had MRI's, a nerve test where they inserted small metal rods into her arms, no numbing, and used electrical shock to see if her muscles reacted, many blood tests and finally muscle, nerve, and tissue biopsies. Finally almost a year after starting testing, we got the diagnosis, Mitochondrial Disorder. There is no cure and her type is not able to be treated. Our only options were to do therapy and a special vitamin regimen to keep her healthy for as long as we have her. We have been told that her condition will take her life before adulthood.Abby playing in the ball pit

Life was busy raising Isaac and Abby, therapy and going to LOTS of doctor's appointments. We decided, even though there was a chance we could have another child with Mitochondrial, we got pregnant again. I think I cried the whole pregnancy, concerned we would have the same issues with this one. Praise the Lord, the day Ezekiel was born, he could already hold his head up and look around the room. I knew he would be okay.

A few months later, Gaven switched from being a youth pastor to law enforcement. His first position was at Seaside Police Department. We moved from Eatonville, Washington to a small town called Naselle, Washington. We needed to stay in Washington to keep Abby's medical coverage. This was a tough move. We were nowhere

near family and it ended up being the toughest years for Abby and our family.
I found a lump in my chest and was told it was a fatty cyst. I told them take it out and when they did, he told me it wasn't cancer, it was fibromytosis, a cyst that grows fast and can attach to vital organs. I had another surgery to remove the last cells, but received a call a few days later, telling me that he was not able to get it all and that I needed to see an oncologist at OHSU to have more invasive surgery. I was mortified and on top of it, Abby had started vomiting that morning and she was now vomiting blood. We rushed her to Children's Seattle where she was hospitalized for a few days with a bowel obstruction. Abby came home but seemed to have a hard time gaining weight. She was under weight and no matter how much I increased her g-tube feeds, she would not keep down the extras. I had my final surgery at OHSU where they removed a rib and a half and part of my abdominal wall. No more surgeries, just annual MRI's to make sure it doesn't come back.
Abby rocking outIn 2010, she got sick again and we decided to go to Portland's Randal Children's Hospital, closer to family. During that stay, the doctors recommended her to get a PICC line in her arm to help increase her calorie count. So now, she would be fed thru her veins. That was a rough year, she finally started gaining weight but with it came over 135 days in the hospital with line infections and many other illnesses. I remember one stay, she was so ill we thought she wouldn't make it home. But she pulled through again. The next three years, we were in the hospital anywhere from 60-75 days a year. Her condition causes any little illness or cold to cause her colon to stop working and she ends up throwing up for days, thus the long hospital stays. Thru it all, God gave us the strength to continue, one day at a time!
In 2012, Gaven got a job with Wasco county Sheriff's office. We needed to be closer to family with my family in The Dalles and Hood River and Gaven's in Oregon City. Since moving here, we have added another member to our family, Josiah, a healthy rambunctious little boy. Now with a family of 6, we are busier than ever. Abby has been healthier in the last year and half with only one hospital stay. God has blessed us with a little more normalcy. I am blessed with boys who are patient with their sister and all the therapies, doctor's appointments, hospital stays and all the things we can't do because of their sister's condition. But they sure love their fishing and hunting adventures with Gaven. Abby is non-verbal, can't sit, stand, or walk. Life with a wheelchair is very limited and the heat and cold can really affect her too, but the Lord has given her a love for music and she loves to play her tambourine. Abby loves most types of music, but I think her favorite is the Leap Frog Dog she got from her great grandma. You push the button and she smiles the biggest smile ever. You can't help but smile with her. I think the Lord knew we needed Abby in our lives. It causes us to slow down and just enjoy the good times, despite the tough ones. And I will have to say, Abigail is the toughest, most loving and patient little girl you will ever meet. Please, come say hi to her.

The Anderson Family

Mike was born and raised in Hood River, Oregon. Mike ‘s dedication to serving his community began at the age of 16 when he became a student firefighter with the Hood River Fire Department. Right after graduation from Hood River Valley High School he chose to serve his country and joined the U.S. Air Force. He spent the next 8 years serving in the Air Force as an Ear, Nose, and Throat Technician at military hospitals. Those were the only years that he spent living away from Hood River and after that time away he was looking forward to returning to his home. He returned to Hood River in 2000.

Mike, Andrea & ChaseHe continued serving his community as a Reserve Deputy for the Hood River County Sheriff’s Office. He also joined the Westside Fire Department as a volunteer firefighter and assistant coordinator for the Student Fire Fighter program for the Hood River Valley.

Mike served as a Reserve Deputy for 6 years. During that time he obtained certification as a Marine Deputy and worked full time in the summer doing Marine Patrol. He spent the rest of his year working at the Hood River Valley High School; while spending weekends and evenings on patrol. During these years Mike also moved his grandmother up to Hood River from Bend to take care of her in her last few years.Heidi and Mike

2007 was a big year, as it was the year that Mike got his dream job and was hired as the full time Marine Deputy in March. We were then married on his family’s Hood River property in June. Mike worked Marine patrol for many years and is now working road patrol. He is a Search and Rescue Coordinator as well as TASER and FST Instructor. Law enforcement is his passion and he has helped countless people during the last 16 years.

Mike’s wife Heidi also works for the Hood River County Sheriff’s Office and is a 911 Dispatcher & Training Coordinator. Together they have a son, Chase, who is 4 years old and has a special bond with Daddy. Mike also has a 21 year old daughter, Andrea, and a 7 month old granddaughter Olivia. Mike loves spending

time with his kids.
Mike had not been feeling well off and on starting in March 2016. On June 23, the day of our 9th wedding anniversary, we found out that he may have a tumor. On June 28th, the day after Chase's 4th birthday, our worst fear was confirmed when Mike was diagnosed with Colon Cancer. A week later Mike underwent surgery to remove the tumor and determined that his cancer was Stage 3. After some time recovering from major surgery he had his first chemotherapy treatment on August 8th. He will now be having chemotherapy treatments for the next 6 months.

Mike has been off work since July 1st. At this point we are not sure what the future holds as we are just starting out on this journey. Returning to work will depend greatly on how his chemotherapy treatments go and there are a lot of unknowns ahead. When Mike was a young child, his father died tragically in a car crash. We are told that colon cancer can be hereditary, but losing his father so early in life, we do not know much about family history. Regular screening for colon cancer is not recommended until age 50. Since Mike is younger than the average person with this disease, he had no way to know this was happening to him. We found out a couple days ago that unfortunately Mike's cancer is Stage 4. I am again not sure how that will change things for us, but obviously it will in some ways.

Mike has spent his life giving to others; to his country, to his community, and to his family. Thank you for supporting us during this uncertain time.

OREGON PRE PURCHASED POINTS

	Amount	Points
Hogg & Davis Inc. – Odell	$3000	(420pts)
